VDTÜV Type-Test Approval

Ham-Let® is a manufacturer of high quality double-ferrule compression fittings.

The **Ham-Let® Let-Lok®** double-ferrule compression fittings are certified by a third party laboratory (VDTÜV) for interchangeability and intermix-ability with Swagelok® double-ferrule compression fittings, as set forth below.

This certification is based on a special Product Type Test approval, issued by TÜV SÜD Industrie Service GmbH®, certifying the similar performance between **Ham-Let® Let-Lok®** double-ferrule compression fittings and Swagelok® double-ferrule compression fittings, as well as the similar performance with interchanged and/or intermixed brands' components, both in accordance with, and based on, the pre-defined test conditions and procedures.

Thus, according to the results of such test, **Ham-Let® Let-Lok®** double-ferrule compression fittings are technically similar to Swagelok® double-ferrule compression fittings.
